

Laminating a Hex Number Plate

1. Print your number plate and align your hex shaped acrylic to the pegs, and the end of the reflective media.

2. Run the Number plate through the roller on your number plate laminator. Ensure this is on the 'acrylic' setting.

3. On a cutting mat, use a craft knife to cut off the excess reflective. Peel off the protective film. You're now ready to use your hex number plate.
